London, UK | alxmuhd@gmail.com | +44 7955 064570 | linkedin.com/in/muhammad-abubakar-308497191

PROFESSIONAL SUMMARY

An analytically rigorous and persuasively articulate Economics & Public Affairs Analyst with an MSc in Economics and Policy and a BSc in Economics and Management Studies. Experienced in translating complex economic and policy data into clear, compelling narratives for non-expert decision-makers, with a strong track record in quantitative research, causal inference and stakeholder-facing communication. Holds a certified Data Analysis qualification (Future Connect, 2026) and has published research in a globally distributed dataset. Comfortable operating in fast-paced, high-output environments where accuracy, analytical mastery and persuasive messaging are non-negotiable.

EDUCATION

MSc Economics and Policy (Merit) – King’s College London	2024–2025
BSc Economics and Management Studies (2:1) – University of Sussex	2021–2024

SKILLS

Analysis & Research:	Quantitative & Qualitative Research, Causal Inference, Econometric Modelling, Policy Analysis, Cost-Benefit Analysis
Communication:	Long-form Policy Writing, Persuasive Messaging, Stakeholder Briefings, Report Production, Public Affairs Narrative
Technical:	Python (Pandas, NumPy, Scikit-learn), R (ggplot2, dplyr), SQL, Excel (Advanced), Power BI, Tableau
Developer Tools:	Git, GitHub, Jupyter Notebook, VS Code, Talend ETL, Azure Data Factory
Other:	Data Visualisation, ETL/ELT, Statistical Modelling, Stakeholder Engagement, Documentation

WORK EXPERIENCE

Happy City Hub	London, UK
Public Policy Researcher (Lead)	Jan 2026 – Present
- Appointed lead researcher for the 2026 Happy City Index - a globally published public policy dataset released on International Day of Happiness - responsible for the full data and policy assessment of Paris across 82 indicators spanning governance, economy, environment, mobility, health and citizens. - Synthesised multi-source data into a coherent, methodologically rigorous comparative policy narrative for an international audience, translating complex socioeconomic indicators into clear, structured outputs for policymakers and public affairs decision-makers worldwide.	
IT Skills	London, UK
Data Analyst	Aug 2025 – Feb 2026
- Produced 5 analytical dashboards and regular stakeholder reports translating 120,000+ data points into clear, decision-ready insights for senior teams - cutting reporting time by ~30% and demonstrating the ability to turn complex data into accessible, persuasive narratives. - Automated 8+ data processing workflows, reducing manual analytical workload by 40% and improving the turnaround of high-quality data outputs - directly relevant to driving content production at pace in a fast-moving media environment.	
Think Pacific	Fiji / Remote
Business & Enterprise Policy Intern	Jul 2024 – Sep 2024
- Conducted a comprehensive international trade policy analysis of Fiji’s turmeric value chain - evaluating buyer demand, pricing structures, regulatory barriers and export logistics - and produced a structured policy recommendations report to increase farmer incomes and reduce reliance on intermediaries. - Developed a not-for-profit export policy model informed by global benchmarking of fair trade and social enterprise intermediaries, translating complex supply chain data into actionable public affairs recommendations for an international development audience. - Assessed production constraints including finance, regulatory certification and institutional partnerships, and analysed B2B and B2C pricing strategies to produce evidence-based recommendations for sustainable participation in international supply chains - directly mirroring the analytical rigour and persuasive messaging required at PMA.	

RESEARCH & POLICY PROJECTS

MSc Dissertation: Conflict Exposure & Democratic Attitudes in Nigeria (75%)	2025
Estimated causal effects of conflict exposure on democratic attitudes using Difference-in-Differences and event-study models with placebo tests and robustness checks - producing an original, evidence-based policy argument at MSc distinction level.	
Cost-Benefit Analysis: Tobacco Excise Tax Policy	2025
Conducted a full social CBA of a \$1.00 cigarette tax increase, modelling \$2.5–3.0bn in projected government revenue, with NPV and BCR analysis across 4 policy alternatives using the UK HMT Value for Money framework - directly translating quantitative data into a clear, persuasive policy recommendation.	
Research Project: The Cognitive Cost of Furlough (70%)	2025
Estimated the causal impact of furlough on cognitive health (GHQ-12) using Instrumental Variables, producing a rigorous policy-relevant analysis with clear public affairs implications for post-pandemic labour market strategy.
